Initiatives For Attendees

Travel

- Use public transportation or car-share with fellow attendees as much as possible.
- Fly economy class and choose non-stop flights, as they are generally more fuel efficient.
- Choose accommodations within walking distance of the conference or have easy access to public transportation.

Energy

- Opt for hotels with green certifications or those that practice sustainable initiatives.
- Be mindful of energy usage in hotel rooms. Turn off lights, air conditioning, unplug devices when not in use.

Materials + Waste

- Use digital resources whenever possible. Use mobile apps for schedules, maps and note taking.
- Exchange digital business cards or use apps for networking instead of printing and exchanging paper business cards.
- Dispose of waste responsibly by using designated recycling and compost bins. Avoid generating unnecessary waste by being mindful of what you take and throw away.
- Avoid the use of single-use items such as disposable water bottles and bring your own reusable bottle to the conference.

Food + Beverages

- Choose local, organic, and seasonal food options when purchasing food.

Water Consumption

- Use water responsibly in restrooms and common areas by reporting leaks.

Education + Engagement

- Attend sessions and/or tours focused on sustainability and share knowledge gained with peers on social media to spread awareness.
- Provide feedback to conference organizers about ways to improve sustainability efforts for future events.
